

F-5 CONSTRUCTION DOCUMENTATION

The Superintendent of Schools or designee shall, as necessary, adopt or develop construction documents to be used in School District construction.

At a minimum, the construction documents shall include forms of contractual agreements between the School District and the Design Professional, the School District and the Contractor, and the General Conditions of the Contract. In addition, such other construction documents as may be deemed helpful and appropriate shall be developed.

In embarking on a construction project the School District shall utilize the construction documents as developed by the Superintendent of Schools or designee and approved by the Board of Education pursuant to this subsection without material changes unless an unusual situation demands a change and there is Board of Education approval of the change.
